

基础概念与原则 (Basic Concepts & Principles)

- Hardware objects; 17.4
- Software objects; 17.4
- Mechanisms vs. Policies; 17.4, 17.14
- Principle of least privilege; 17.5
- Need-to-know principle; 17.9 **系统保护结构 (System Protection Structures)**

- Protection Rings; 17.6, 17.7
- User mode & Kernel mode; 17.6
- Privilege separation; 17.6, 17.7
- Gates / Traps / Interrupts; 17.7
- Hypervisors; 17.7
- ARM TrustZone (TZ ring); 17.7

- Exception Levels (EL0, EL1, EL2, EL3); 17.8 **保护域机制 (Domain of Protection)**

- Domain of Protection; 17.9, 17.11
- Access right; 17.10, 17.12
- Domain switching; 17.10, 17.11
- User as a domain; 17.11

- Process as a domain; 17.11
- Procedure as a domain; 17.11 **访问矩阵 (Access Matrix Models)**

- Access Matrix; 17.13
- Dynamic protection; 17.15
- Owner rights; 17.15, 17.18
- Copy rights (*); 17.15, 17.17
- Control rights; 17.15, 17.19

- Transfer (Switch) rights; 17.15, 17.16

- Revocation of access right; 17.15 **访问矩阵的实现 (Implementations of Access Matrix)**

- Global Table; 17.20

- Access-control list (ACL) / Access lists for objects; 17.21, 17.22

- Capability list for domains; 17.21, 17.23
 - Lock-key mechanism; 17.24
 - Comparison of Implementations; 17.25
-
